

UC San Diego Deep Decarbonization Initiative (D2I) 2016-2017 Research Seminar Series

Dir. William Torre

Bill Torre is the program director for Energy Storage Systems at the Center for Energy Research and oversees research on developing energy storage and integration of renewable generation. This work includes energy storage demonstration projects that test and demonstrate advanced energy storage technology to improve the performance of micro-grid operations and renewable generation.

Presentation Topic

Accommodation of higher penetration of renewable generation by implementation of energy storage and other advanced smart control technology to meet Decarbonization objectives

**Wednesday, January 25th, 2:30-4pm
Henry Booker Room, 2nd Floor, JSOE EBUI
Please RSVP to D2Iseminars@ucsd.edu**
